- Multiple secure delivery options using patented Best Method of Delivery (BMOD)
- Automatic, bi-directional email encryption between Zix customers
- Innovative dashboard with instant access to more than 30 reports
- Policy-based TLS with secure fail-over

Policy-based Email Protection

ZixEncrypt provides robust filtering technology that enables you to define and manage policy rules for protecting sensitive email content and ensuring compliance. Pre-defined filters are available for healthcare, financial, state privacy, education and more. Based on the email content you can determine if the email should be blocked, routed, quarantined or encrypted.

Bi-Directional Transparent Delivery

Just as ZixEncrypt automatically scans your email, it also automatically determines the most efficient way to securely deliver your messages using our patented Best Method of Delivery℠. Through the Best Method of Delivery, encrypted email is delivered to anyone, anywhere and often transparently Zix offers the industry’s only bidirectional transparent email encryption, enabling senders and recipients to exchange encrypted email without any extra steps. When you send an encrypted email to another Zix customer, the message and replies are encrypted transparently, so that not even a password is needed. On average, more than one-third of our customers’ recipients receive their encrypted email messages transparently.
About Zix

Zix is a leader in email security. Trusted by the nation’s most influential institutions in healthcare, finance and government, Zix delivers a superior experience and easy-to-use solutions for email encryption and data loss prevention, advanced threat protection, archiving and bring your own device (BYOD) security.
