- Email security visual reminder

Combined Solution Advantages

- ZixGateway enforces email policies
- ZixOne manages mobile access & security
- Robust compliance reporting
- Implement in less than a day
- Consistent security for all email users

Organizations who bundle ZixOne with ZixGateway benefit from a complete email data security solution. ZixSelect Mobile streamlines the process of sending encrypted emails from mobile devices by integrating ZixOne with ZixGateway, thus experiencing the industry’s easiest to use mobile email encryption service. ZixSelect Mobile empowers your employees to be the first-line of defense for individual messages, while ZixGateway enforces your global policies by scanning email and attachments for sensitive content. With just one touch, ZixSelect Mobile users can choose encryption while composing, forwarding, or replying to any email. The prominent “Encrypt Message” option enhances employee awareness of email encryption while avoiding the use of special keywords that can easily be forgotten by users, or altered by the device’s autocorrect function. As a further benefit, ZixGateway continues to scan emails in real time for sensitive information and will encrypt per your company email policies even if the “Encrypt Message” button has not been activated by the user.

ZixOne

ZixOne is a secure mobile email service that gives users easy access to corporate email, calendar, and contacts. ZixOne works for BYOD or corporate-owned devices and never stores your sensitive corporate email on the device. Instead, ZixOne displays the information to the user via a

About Zix Corporation

Zix is a leader in email data protection. Zix offers industry-leading email encryption, a unique email DLP solution and an innovative email BYOD solution to meet your company's data protection and compliance needs. Zix is trusted by the nation's most influential institutions in healthcare, finance and government for easy to use secure email solutions.

Zix Corporation

secure connection by leveraging your existing email infrastructure. Users read and write emails, manage their inbox and folders, and create or view calendar appointments and contacts in real-time. ZixOne is more secure than competing corporate solutions because it never stores corporate data in the device's permanent memory.

ZixGateway

ZixGateway is a policy-based email encryption appliance or hosted service. ZixGateway inspects all outbound emails and their attachments in real-time, ensuring they adhere to your company email policies. It automatically enforces global user compliance for email communication without requiring special training or procedures for employees. By leveraging the world's largest public encryption key repository, ZixDirectory, and the ZixCorp Best Method of Delivery (BMOD), ZixGateway delivers encrypted email to anyone, anywhere, and usually with no additional steps required by the sender or the recipient. ZixGateway also provides the industry's only bidirectional, transparent email encryption solution. Members of this Zix Encryption Network benefit from the mutual secure exchange of email without portals, passwords, or extra steps.

ZixSelect Mobile

Organizations using both ZixGateway and ZixOne can safely send and receive encrypted email to or from anyone, anywhere, from any supported device. ZixSelect Mobile not only enhances security awareness for your employees, but also makes it easier to select encryption for individual messages - freeing your employees to focus on what's most important: getting their jobs done efficiently and securely.
