MIGRATING TO THE CLOUD

MAXIMIZE YOUR VALUE WITH ZIX

- Flexibility
- Scalability
- Productivity
- Cost Savings
- Disaster Recovery
- Storage
- Automation
- Security

"In many ways, the cloud is safer than in-house IT, because it's subject to strict physical and digital security controls that exceed what most enterprises can achieve independently. As well, it can be a cheaper, more reliable, more extensive means of storage that offers organizations greater flexibility in regards to geographic distribution."

— **MICHAEL OSTERMAN,** President, Osterman Research
