

Why make the switch to OpenText Security Solutions?

Your one-stop shop for email security

Email is the most common form of communication. Employees may send sensitive information or don't check a link before clicking. That's why securing your business' critical information is important, especially if your business operates in a highly regulated and compliance-driven environment, like finance, healthcare, insurance or government.

OpenText Security Solutions offers agile, highly adaptable email security solutions that can be customized based on the changing needs of your business. We provide the essential solutions to protect your business from pervasive threats and arm your employees with the know-how to avoid cyber threats like phishing.

Discover the Email Protection Fundamentals

Webroot® Security Awareness Training

An easy to implement, ongoing training program that reduces the risk of security breaches through phishing simulations and microlearning.

Webroot™ Email Encryption powered by Zix™

Provides businesses a secure approach to managing communications by encrypting messages and information automatically before it is delivered.

Webroot™ Advanced Email Threat Protection

Provides businesses a secure approach to managing communications by encrypting messages and information automatically before it is delivered.

What makes OpenText Security Solutions different from other providers?

We offer a comprehensive one-stop cyber resilience SaaS portfolio that combines multi-layered data security and data management solutions to help keep your business productive and secure.

We provide SaaS solutions that work out-of-the-box with minimum administration time.

Our services are backed by a globally tenured, responsive support team at no extra cost.

Our cloud-to-cloud backup solution helps protect SaaS data no matter where it resides – Microsoft 365, Google Workspace, SharePoint, Salesforce, Box or Dropbox.

Our advanced email threat protection solution features identity protection, attachment disarming/sandboxing, threat detection, spear phishing and BEC scams are included in the core product.

To take advantage of our full suite of cyber resilience solutions, explore our other bundles.

In addition to Email Protection Fundamentals, get enhanced endpoint and DNS protection, as well as cloud-to-cloud backup with our **Security Protection Plus** and **Pro Security and Backup** bundles.
