Commitment to Our Community

Zix is committed to providing world-class products and services in an environmentally responsible manner.

Reducing Our Environmental Impact:

Data Center Efficiency Management

(2011 upgrade and ongoing improvements)

20%

Renewable Energy in Our Core Data Center

Products Support Paperless Work-from-Home

14%

Office Space Reduction in 2020

4 Pillars of Zix Environmental Focus:

FOCUS ON ZIX ACTIVITIES TO REDUCE ITS OWN EMISSIONS

As a technology company, Zix has a limited environmental footprint largely centered on energy consumption for data processing operations. We seek to reduce energy consumption for these operations and across our business model generally.

FOCUS ON ZIX ACTIVITIES TO REDUCE VALUE CHAIN EMISSIONS

Evaluate the best mix of processing and storage at either our Data Center, service provider Cloud, or co-location facilities, factoring power effectiveness and energy efficiency and seeking to reduce our overall footprint.

OFFER PRODUCTS THAT ENABLE THE REDUCTION AND REMOVAL OF CUSTOMER AND SOCIETAL EMISSIONS

The original vision underlying the first Zix encryption product was to enhance the replacement of physical mail and delivery. This vision carries through today as Zix security and other services makes the modern workspace secure for electronic communication, thus avoiding the underling environmental costs associated with physical mail and transportation.

CONTRIBUTE BEYOND THE ZIX BUSINESS

Look for opportunities beyond the scope of our business to contribute to efforts against climate change.
